

# FRONTLINE CENTRAL™

## Specifications

**Frontline Central** is a powerful software addition to the Frontline Communicator. It enables one central computer to manage communications with many Frontline Communicator units operating under different bandwidth conditions. Using Frontline Central, you may interact in real-time with a team of Frontline Communicator users dispersed throughout a plant or even anywhere around the world. By doing so, Frontline Central provides you with multiple points of view instantaneously thus facilitating and accelerating the review and assessment of any situation.

Frontline Central runs on an IP network. It is equipped with numerous call management features. For instance, you may choose the number of participants that can take part in the audio conversation, or save video images for future use.

### Specifications:

- ▶ Audio/video communication between multiple Frontline Communicators and a PC
- ▶ Real-time video decoding and viewing
- ▶ Real-time audio encoding/decoding
- ▶ Audio and video communication starting at 30 kbps of bandwidth
- ▶ Manage different bandwidths
- ▶ Audio is mixed so that all participants can communicate
- ▶ Audio can be muted for selected participants
- ▶ Operates on IP network
- ▶ Reception of still frame images (jpeg)
- ▶ Simple and user friendly interface
- ▶ Firewall friendly
- ▶ Address book
- ▶ Call management
- ▶ The number of connections is only limited by the processing power of the PC
- ▶ Selected connections are displayed in windows, others are displayed in thumbnails windows.

### Compatibility:

- ▶ Windows XP
- ▶ Microsoft .NET Framework
- ▶ MPEG4

### Sectors of Application:

- ▶ Security & Public Safety
- ▶ Industrial
- ▶ Manufacturing
- ▶ Engineering & Project Management
- ▶ First Responders
- ▶ Etc.

### System requirements to support four simultaneous communications:

- ▶ Pentium 4, 2.5 GHz
- ▶ 1 GB RAM
- ▶ A microphone
- ▶ Earphone (recommended) or speakers
- ▶ A sound card
- ▶ Large high quality monitor
