

FRONTLINE

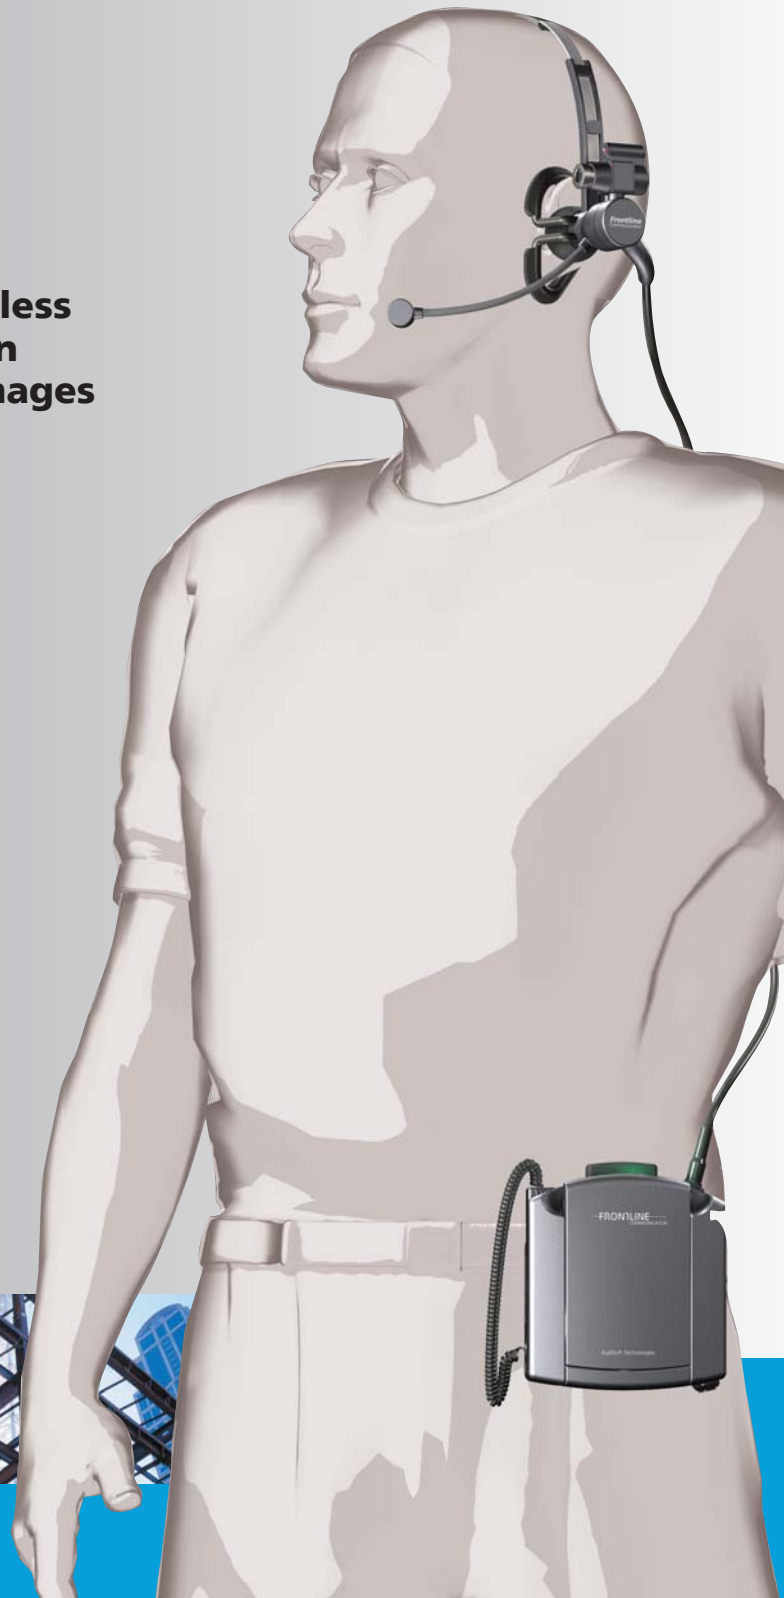

COMMUNICATOR™

On sight solution

▶ The Frontline Communicator is a wireless and wearable communication solution that enables you to transmit video images in real-time and have a conversation with someone located offsite.

- ▶ Get instant access to experts
- ▶ Make better and faster decisions
- ▶ Increase productivity
- ▶ Reduce downtime
- ▶ Enhance customer satisfaction

AUDISOFT™
www.audisoft.net

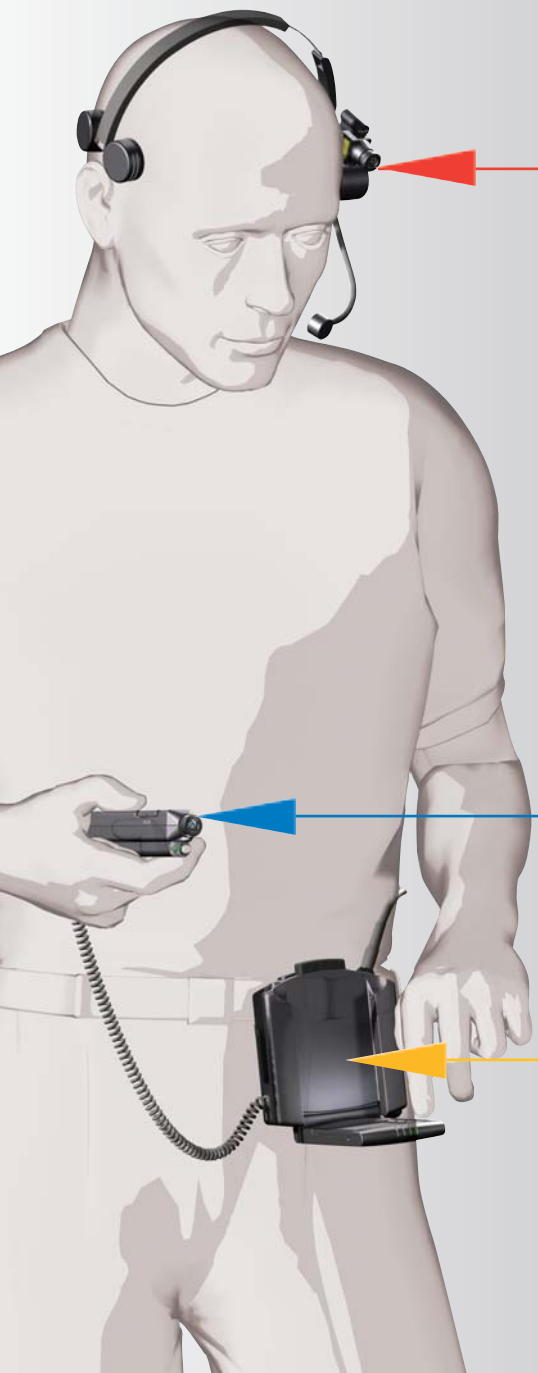

Small. Lightweight.
Wearable. Wireless.

Carefully designed for various environments, the Frontline Communicator is a hands-free audio and video communication solution that offers unparalleled mobility. The Frontline Communicator also allows you to film and store video images for future use.

FRONTLINE COMMUNICATOR™

The Frontline Communicator is based on technological integration and a complex miniaturization process. This unique and innovative IP communication system is ideal for remote support, remote collaboration and distance training applications.

With the Frontline communicator, you can considerably reduce response time, increase your productivity and improve your customer service.

Headset

Designed to leave its user completely hands-free, the Frontline Communicator headset is equipped with a miniature colour video camera, a pointer device, a directional microphone for noise reduction and a high-quality earphone for optimal sound reception.

Battery charger

Created specifically for the Frontline Communicator, the battery charger will rapidly recharge the system's batteries. (Sold separately.)

Hand-held camera

With its integrated light, adjustable focus and pointer, the Frontline Communicator's hand-held camera is easy to handle and is ideal for video close-ups.

Transmission module

The Frontline Communicator's transmission module houses a powerful computer and a state-of-the-art codec. It is also equipped with CompactFlash® and PCMCIA card readers and an SDIO slot. The transmission module is powered by a long lasting rechargeable Li-ion battery.

Main features

- Full duplex audio and one-way video
- IP communication
- Live transmission on high and low bandwidth
- Recording and snapshot capabilities
- Dual camera system

Applications

- Technical remote support
- Telemaintenance
- Remote collaboration
- Distance training
- Transmission of critical information
- Investigation and evidence recording

Wireless network compatibility

- Wi-fi (802.11b)
- Cellular
- Bluetooth
- Satellite and RF networks

Sectors

- Industrial
- Public safety
- Health/Telehealth
- Aeronautics
- Inspection and control agencies
- Energy
- Engineering and construction
- Architecture
- Project and operations management

Communication software solution

This license-free proprietary software is easy to install and easy to use. It allows a person using a PC to have a two-way conversation with the Frontline Communicator user. With this software, you can also receive colour video images instantaneously and capture still snapshots for future use.

About us

Established in 1997, AudiSoft Technologies develops, manufactures and markets high-end audio-video communication systems. Lightweight and portable, our solutions provide complete mobility to its users.

AudiSoft Technologies has been awarded many prestigious prizes internationally for innovation, design and quality thus recognizing the company's breakthrough technologies and achievements.

Our products are available worldwide through our network of authorized distributors, resellers and VARs. For more information, call us or visit our website at www.frontlinecommunicator.com.

Proud partner of

Other products

The AudiSee

The AudiSee is the world's first audiovisual FM system for oral-deaf or hard-of-hearing students. With the AudiSee, students have instant access to all the information given by the teacher. The AudiSee is available in North America.

The MED-330

Small, discreet, light and unobtrusive, AudiSoft Technologies' MED-330 headset camera offers an exceptional price/quality ratio. Designed to be mounted to a medical headset, the MED-330 produces colour images comparable to ones obtained from products significantly more expensive.

The ATI-330

The ATI-330 is a small hand-held camera. Lightweight and easy to use, the ATI-330 is ideal for many applications. For instance, it can be connected to a videoconferencing system, a television or a projector.

The AFX-40

The AFX-40 is a small state-of-the-art multipurpose color video camera that can achieve the highest quality of image even in very low light conditions. The AFX-40 is equipped with a 40x zoom, a laser pointer and an integrated lighting system. It can be connected to your Frontline Communicator or used with a videoconferencing system, a television or a projector.
